EDUCATION

Technical University of Munich <i>Master of Science in Informatics (Computer Science)</i> Focus on Software Engineering, Distributed Systems, and Machine Learning	October 2021 – September 2024 <i>Munich, Germany</i>
Stanford University <i>Master's Thesis and Visiting Researcher</i> Building a hypertension medication recommendation system for remote patient management	March 2024 – September 2024 <i>Stanford, USA</i>
Peking University <i>General Visiting Student (Semester abroad)</i> Co-organized and spoke at PKU's first Exchange Cafe about LLM's and ChatGPT	February 2023 – July 2023 <i>Beijing, China</i>
Technical University of Munich <i>Bachelor of Science in Informatics (Computer Science)</i>	October 2017 – June 2021 <i>Munich, Germany</i>

EXPERIENCE & INTERNSHIPS

Stanford Mussallem Center for Biodesign <i>Software Engineer</i> Full stack development of a hypertension management platform for remote patient monitoring using Typescript and React	September 2024 – Present <i>Stanford, USA / Remote</i>
Weavs GmbH <i>Software Engineer (Working Student)</i> Full stack development of several core features of Citymonitor, an IoT SaaS platform for smart cities using Elixir and the Phoenix framework	October 2023 – March 2024 <i>Dornbirn, Austria</i>
Technical University of Munich, Digital Health Group <i>Software Engineer (Academic Assistant)</i> - Mobile development of an iOS app that improves users' fitness and health by supporting multimodal navigation - Improved average route search performance by over 50%	October 2021 – March 2023 <i>Munich, Germany</i>
ALEAS AG <i>Software Engineer (Working Student)</i> - Full stack development with .NET for internal and customer-facing software with 2500+ active users - Mobile development of a cross-platform team-challenge app with React Native and the Firebase platform	July 2019 – November 2022 <i>Ruggel, Liechtenstein / Hybrid</i>
Tesla, Inc. <i>Logistics Software System Configuration (Internship)</i> - Initial configuration of the material flow software system for intralogistics at the Tesla Giga Berlin factory - Requirements engineering and architectural conception based on exchange with material flow planners	March 2021 – May 2021 <i>Grünheide, Germany</i>

AWARDS & EXTRACURRICULAR EXPERIENCE

hackaTUM 2022, 2023 & 2024 Winner - Overall winner of hackaTUM 2022 & 2023, one of EU's biggest hackathons, out of 220 teams (800+ participants) 1st place in the 'City of Munich' 2023 & 2024 challenge and 2nd place in the 'Sixt' 2022 challenge	November 2022, 2023, 2024
MINGA Mentor Mentor for incoming exchange students to guide them during their time in Munich and at TUM	August 2022 – February 2023
Ferienakademie 2022 – "Decentralized Decision Making" - Research summer school in cooperation with Siemens for selected students aimed at exploring innovative ideas - Development of a self-organized robot delivery system with focus on decentralized decision making using MQTT	September 2022

SKILLS

Languages: German, English (C1), Chinese (HSK1)
Programming Languages: Typescript, Swift, Elixir
Frameworks & Tools: React, SwiftUI, Phoenix, PostgreSQL, Firebase, Docker, Git
